Re: The ICS Prize for Excellent Graduate Students

Dear ICS Members,

It is my great pleasure to announce the winners of the ICS Prize for an Excellent Graduate Student. This year there were many strong candidates from all universities and it was very difficult to resist the temptation of awarding the prize to more than one student from each institution. Yet, we decided to limit the number just to one. Overall, together with Tamar Stein, winner of the Lise Meitner prize for computational chemistry we have a total of seven, well-deserved winners.

Congratulations to every one of them,

Ehud Keinan
